Publication Stage :
  (B1) U.S. Patent (no pre-grant pub.) after Jan. 2, 2001
Abstract :
  A waste bin structure includes an inner barrel, an outer barrel, and a
 barrel lid. The lid cover includes an inner cover, an outer cover, and a
  locking portion. The inner cover is provided with a touch portion that
  may be pressed to pivot the inner cover upward independently. The outer
  barrel has a connecting portion defining a hanging recess, and the inner
  barrel is provided with a hanging hook portion secured in the hanging
  recess. The outer barrel is provided with a hood to form a handle
  portion of the outer barrel, so that the outer barrel is portable. The
  lid cover of the waste bin structure can be opened by a triggering
  action, and alternatively by a stepping action of a foot.
